

WALT: read and understand a non-fiction text

Lesson 3 - 17<sup>th</sup> June 2020

## Birds in Your Garden

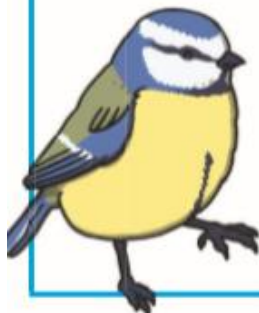

### Robin

Robins are very easy to spot in your garden. They have a red breast and a brown head and back. They have long legs and a short tail. They live in one area to stop other robins living there. They eat insects, fruit, seeds and worms.

### Jackdaw

The jackdaw is a noisy bird. They are quite large and have a grey neck, a short beak and white eyes. They eat insects, dead animals and other birds' eggs. They live in woods, parks and gardens. Jackdaws steal things; not just food but objects too!

### Blue tit

The blue tit is a very small bird with bright yellow and blue feathers. They eat insects, seeds and nuts. They eat from bird tables and live in garden nesting boxes.

### Blackbird

Blackbirds are very common garden birds but they also live in farmland and woodland. Blackbirds live on their own. The male is black with an orange beak, and he has an orange ring around his eye. The female is dark brown with a brown beak. They nest in trees and like to sing.

**Answer the questions. You can write them on a piece of paper if you cannot print out.**

What colour is the breast of a robin?

The breast of a robin is \_\_\_\_\_.

Write down 2 things that a blue tit eats.

---

What colour are a jackdaw's eyes?

---

Blackbirds live in gardens but also in other places. Put a circle around another place they might live.

on a beach

in woodland

in a zoo
