

## SQUARES Maths Week 8 – Monday 1<sup>st</sup> March

Today you are continuing looking at multiplication and counting in steps of 5.

**Task 1:** Look at the table showing the multiplication equations. Work out the answer to each equation and then match it to the correct picture at the bottom. Your answers can be set out like this

a)  $1 \times 5 = 5$  matches picture 5.

a) $1 \times 5 =$	e) $3 \times 5 =$
b) $= 2 \times 5$	f) $= 7 \times 5$
c) $= 6 \times 5$	g) $9 \times 5 =$
d) $4 \times 5 =$	h) $= 8 \times 5$

The sweet shop sells sweets for 5p each.

If you bought 1 it would cost 5p.

If you bought 2 it would cost you 5p. This is because  $2 \times 5$  is 10.

**Task 2:** Complete the table on the next page. Remember each sweet costs 5p each. The first 2 rows have been completed for you to help.

Number of sweets	Number of five pence coins	Multiplication equation
		$1 \times 5p = 5p$
		$2 \times 5p = 10p$

**CHALLENGE:** Do you notice anything in the table? Explain to someone what you have noticed or write your explanation down.
