

## SQUARES Maths Week 7 – Tuesday 2<sup>nd</sup> March

Today you are continuing looking at multiplication and counting in steps of **10**.

**Task 1:** Look at the table showing the multiplication equations. Work out the answer to each equation and then match it to the correct picture at the bottom. Your answers can be set out like this

a)  $1 \times 10 = 10$  matches 2.

a) $1 \times 10 =$	b) $4 \times 10 =$
c) $= 2 \times 10$	d) $= 7 \times 10$
e) $= 6 \times 10$	f) $5 \times 10 =$

1) 	2) 
3) 	4) 
5) 	6) 

Cakes need 10 eggs each.

If you baked 1 cake I would need 10 eggs.

If you baked 2 cakes, I would need 20. This is because  $2 \times 10$  is 20.

**Task 2:** Complete the table on the next page. Remember each cake needs 10 eggs. The first row have been completed for you to help.

Number of cakes	Number of eggs	Multiplication equation
1		$1 \times 10 = 10$
