

## CIRCLES Maths Week 6 – Monday 8<sup>th</sup> February

This unit will revisit calculation strategies.

You will use your number bond facts, 'make ten' strategy and your knowledge of doubles.

**Task 1:** Write down 10 different ways to make 10 using 2 numbers.

*E.g.  $10 + 0 = 10$*

**Task 2:** Complete the Part-Whole model and use the answers to help you to complete the missing numbers.

**CHALLENGE:** explain what you have noticed when using the part-whole models to answer the questions.

1)

$$3 + 4 = \square$$

$$\square = 13 + 4$$

$$4 + \square = 7$$

$$17 = 4 + \square$$

$$7 - 3 = \square$$

$$13 = 17 - \square$$

$$7 - \square = 3$$

$$4 = 17 - \square$$

2)

$$\square = 1 + 8$$

$$19 = \square + \square$$

$$9 = \square + 1$$

$$19 = \square + \square$$

$$\square = 9 - 8$$

$$\square = 19 - \square$$

$$8 = 9 - \square$$

$$\square = 19 - \square$$
