

Year 6 Maths - Wednesday 20th

January

Today we will continue to work on percentages and statistics using Oak National Academy.

Today we are going to solve problems involving the calculation of percentage amounts. Here is the link:

<https://classroom.thenational.academy/units/percentages-and-statistics-fd0a>

Please click on lesson 3

Lessons in this unit

Lesson 1

Understand what a percentage is and its connection to fractions

15m video

Lesson 2

Recall and use equivalences between fractions, decimals and percentages

21m video

Lesson 3

Solve problems involving the calculation of percentages of amounts

27m video

Lesson 4

Solve problems involving the use of percentages for comparison

14m video

This lesson begins with an introductory quiz based on the knowledge you gained in yesterday's lesson. **Please send the score you get on this when you upload your work and let us know it is the introductory quiz.**

You need to watch the video (there are details on how to do this on the sheets from last week's work). There are different points in the clip where you need to pause the clip while you

complete a question. Please make sure you do this, as these questions are linked to your task so it's good to practice with the examples. **These do not need to be added to Class Dojo.**

There is also a point in the video where you are asked to complete an individual task. **You need to take a photo of this work and add it to Class Dojo.** Please watch the rest of the video, once you have completed your task as the answers are explained to you. You can mark your work as we do in school (you don't need to mark in purple!) **You then need to complete the quiz and include the score you got when you add your work to Class Dojo.**
